

# 42<sup>nd</sup> Polish Seminar on Positron Annihilation

29 June - 1 July 2015, Lublin, Poland

## First Announcement

It is our pleasure to invite you to participate in the 42<sup>nd</sup> Polish Seminar on Positron Annihilation. The conference will be held on 29 June - 1 July 2015 in Lublin (Poland). The purpose of PSPA-15 is to gather people interested in research related to the positrons and positronium annihilation in order to exchange ideas concerning new results and experimental or theoretical methods in this field. The conference will include invited talks along with contributed oral and poster presentations regarding the following topics:

- Theory
- Technical developments
- Metals, alloys and oxides
- Semiconductors
- Surfaces/Interfaces
- Polymers/Softmatter
- Porous materials and nanostructures
- Materials of biological and technological importance
- Positronium physics and chemistry

The conference place will be the building of Faculty of Mathematics, Physics and Computer Science, which is located in the campus of Maria Curie-Skłodowska University.

We invite you, your coworkers and students to [pre-registration](#).
